Garment Accessories Unit

Flaxen Group is one of the rare companies that also has an in-house manufacturing facility for making labels and sewing thread for garment products its call Flaxen Trims, which gives it an edge for faster turnaround and changes as per the customers' requirements.

The sewing thread ranges in different counts and blends and can be used for casual or formal clothing items. As for the labels, the brand logo labels and fabric composition/washing instruction labels are made to add to the garment products. Our factory is certified by Global Recycled Standard (GRS).
